Exterior Door Systems

THE MASTERCRAFT® DIFFERENCE

For over 40 years we've been building better doors. Doors that offer unbeatable quality, convenience and design. Doors built in America, by people passionate about everything that opens and closes. Wood, fiberglass, steel. We work with them all. Fashioning doors engineered to perform- day after day, after day. So, whether you're after one, or many, be confident. Because with **MASTERCRAFT®**, you will always get a great door, inside and out.

Nova 22" x 64" Full Lite Shown in
Prefinished Navy Blue Steel

Quality

Doors are opened, closed, slammed, kicked and knocked on every day. No matter the material, ours are built to last.

Customization

Doors allow you to express your creativity and personalize your home; this is why we offer the opportunity to design a door that is right for your home.

Convenience

We make buying a door easy, fast, and reliable. Yes, customized doors that are built and shipped in 7 days.

EXTERIOR DOOR OVERVIEW

Choosing Your Door Material

Whether you prefer the strength and security of steel or the durability of fiberglass, every **MASTERCRAFT®** Exterior Door is energy efficient and is built to last a lifetime.

FOLLOW THE KEY

Look for these icons throughout the brochure to know what material each door is available in

- PS** Prefinished Steel
- S** Steel
- PF** Prefinished Woodgrain Fiberglass
- SF** Smooth Fiberglass

Prefinished Steel

Prefinished Woodgrain Steel

PS

MASTERCRAFT® prefinished woodgrain steel feature a 7 mil thick vinyl, creating a corrosion, chemical, scratch and fade resistant surface that is 5 times thicker than paint! You get the look of wood without the maintenance and all the same great benefits of our steel door.

Prefinished Solid Color Steel

PS

MASTERCRAFT® prefinished solid color steel provide the same great benefits of all steel doors and go through a 7-step finishing process to provide a lifetime of vibrant fade resistant color. Spend more time enjoying the view and let us do the finishing for you.

STEEL DOOR ADVANTAGE

What you can expect from your **MASTERCRAFT®** Steel Door.

A Complete Frame System

Choose from multiple frame options featuring high performance compression weatherstripping.

B Energy Efficient Insulated Glass

Safety tempered insulated glass.

C Reinforced Lock-Block

Added to provide strength and security.

D Rigid Steel Construction

Durable 24 gauge galvanized steel surfaces resist rust, peeling and warping.

MASTERCRAFT® Steel Doors are built with a wood stile and composite rail, providing maximum protection against temperature fluctuation.

E Polyurethane Foam Core

An environmentally friendly Polyurethane foam is sprayed in, allowing it to fill every inch of the door. This helps make **MASTERCRAFT® Steel Doors** one of the most energy efficient doors on the market.

F High Definition Door Panels

Deep embossing creates a sharp and detailed look, adding to the curb appeal of each door.

G Tight Sealing Sweep

The flexible bottom sweep creates a tight seal to prevent water or air infiltration.

H Superior Sill Construction

Our sill is designed to prevent energy loss and build-up of condensation and adjusts to create a tight seal. Each sill features a composite bottom that will not rot.

DOOR CONSTRUCTION

Interlocking Heads
Continuous heads with interlocking mull posts for exceptional strength

Installation Clip
Keeps the door square for easier installation

Weatherstrip
High performance compression weatherstripping and corner seals create a tight seal to keep the weather out.

One Piece Mull Construction
Our mull systems include inactive seats engineered for perfect sidelite panel placement.

Sill Gaskets
Provide second water barrier between the sill and the frame

Continuous Sidelite Door Systems Benefits

Engineered Sidelite Gasket Seats
Engineered for perfect panel placement and a clean finished look

Inswing Double Door System Benefits

Installation Clip
Helps keep the door square for easier installations

Pre-Installed Catch Plates
Speeds up installation

Thermally Broken Astragal
Reduces cold transfer

Weatherstrip
High performance compression weatherstripping and corner seals create a tight seal to keep the weather out.

Sill Gaskets
Provide second water barrier between the sill and the frame

DOOR CARE

Corner Seals

All of our **MASTERCRAFT**® doors have corner seals installed in the bottom corners of the frame on an exterior door. These seals help to prevent air leakage and water from entering the home. Make sure that the corner seals are in good condition once the door is installed. If a seal shows signs of damage, promptly replace the damaged seal with a new corner seal, which are available at your local **MENARDS**® store.

External Grille 22" x 14" 3 Lite Shown in Prefinished Moorish Teak Fiberglass

Caulking of door

All exterior frame styles need to be caulked in three major locations to stop the infiltration of water and air:

- A Caulking around the brickmould**
A bead of caulk should be applied around the outer edge of the brickmould and where the brickmould contacts the frame to prevent infiltration from between the door and the house.
- B Caulking around the sides of the sill**
The sill should be caulked from the front of the sill, around the weatherstrip and corner seal, to the back of the sill; anywhere the sill contacts the frame.
- C Caulking under the sill**
Caulk underneath the sill and along the bottom of the sill, where the sill connects to the ground.

Check these areas once a year and recaulk as needed. Keeping these areas caulked will increase the life span of your door maintaining its function and beauty for years to come.
